

## Product specification

**PASTEURIZED EGG-YOLK LIQUID**

The *Pasteurized egg- yolk liquid* is made from „A” classified (Council: 1234/2007/EK and Committee 589/2008/EK), fresh hen egg with the separating of the egg- white, homogenized and pasteurized egg liquor, in case of the preservative- containing variation it is made with preservatives. Application is the same as of the egg with shell. The product contains nothing allergen content but the egg. According to the statements of our supplier we certify that the forages of the hen substances don't contain genetically modified (GMO) components. The heavy metal, dioxin and PCB contents of the product are suitable for the determined limits in 1881/2006/EK.

Physical and chemical parameters			
Parameter		Without preservatives	With preservatives
Colour		Yellow – orange.	
Taste and smell		Pleasant, typical of egg- yolk, free from any strange smell and taste.	
Strenght		Fluent, homogeneous, steadily mixed, free from foam, mass, shell or any other kind of originated contamination.	
1 kg contains		~63 pcs egg - yolk	
Dry matters		Min.: 43,0 %	
Average nutritive value content in 100 g product	Energy	1 469 kJ (350 kcal) g (literary data)	
	Protein (Nx6,25)	13 g	
	Carbohydrate	1,1 g	
	- of which sugar	1,1 g	
	Fat	26 g	
	- of which saturated	7,8 g	
	Food fibre	0 g	
Natrium		51 mg (literary data)	
Other datas	Trance fat acid	0 g	
	Chemical reaction (pH)	6,0-6,5	5,0-7,0
	Potassium-sorbat	-----	Max.: 3 000 mg/kg
	Citric acid	-----	Max.: 5 000 mg/kg
Microbiological parameters (in case of both versions)			
Paraméter		Érték	Vizsgálati módszer
Salmonella		0/25 g	EN ISO 6579:2002
Number of microbe		Max.: 10 <sup>4</sup> /1g	MSZ EN ISO 4833:2003
Enterobacteriaceae		Max.: 10 <sup>2</sup> /1g	MSZ ISO 7402:1999
Staphylococcus aureus		0/1 g	MSZ EN ISO 6888-3:2003
Other parameters			
Parameter		Without preservatives	With preservatives
Packaging unit		19,0 kg	1,0 kg      19,0 kg
Best before		3 days	10 days      8 days
Wrapping		Plastic can covered with polyethylene foil.	Top Hill Pack, polyethylene covered carton.      Plastic can covered with polyethylene foil.
Storage		Between 0- +4 °C, in clean, smell - free place.
